

API ENDPOINTS | AI TEAM

Replace the local url, `http://localhost:4001` with the production server address, `https://enzo01.flyumojaairways.com`, if you want send request to the production server. And don't forget to use the actual id of flights, users, booking etc. from the productions database.

LOGIN

GENERATE OTP AND SEND TO USER EMAIL

1. END POINT

POST `http://localhost:4001/api/client/auth/generate-otp`

2. REQUEST

Pass the following user email to the body of your request.

```
{
  "email": "natnaelmekonnengebretsadik@gmail.com"
}
```

3. RESPONSE

```
{
  "msg": "success"
}
```

Go to the inbox of the email to get the generated OTP and use it in the next step to login

LOGIN WITH THE USER EMAIL AND GENERATED AND SENT OTP

1. END POINT

POST `http://localhost:4001/api/client/auth/login`

2. REQUEST

Pass the following json to the body of your request.

```
{
  "email": "natnaelmekonnengebretsadik@gmail.com",
  "OTP": "y7IY7C" //This expire in 5mins
}
```

3. RESPONSE

```
